LEADING THE WAY IN FIRE PROTECTION

# COOPERS PROTECT FIVE GUYS FAST FOOD RESTAURANT IN DUBAI MARINA MALL

## WHAT TYPE OF FIRE PROTECTION WAS THE CLIENT LOOKING FOR?

Five Guys is a global fast food chain of restaurants with a new outlet located in the popular Dubai Marina Mall in Dubai. Coopers manufactured a two sided, FireMaster open Concertina fire curtain for our distributing partner in Dubai UAE, Dosteen Doors and Shutters.

Dosteen worked closely with contractor, Al Tayer Stocks LLC, to ensure fire regulations were adhered to, offering the right level of fire protection to the staff and customers.

The Concertina fire curtain is installed around the main counter in the premises. The counter divides up the main restaurant from the serving area and kitchen. In the event of a fire, the fire curtain will deploy around the counter, acting as a fire break between the kitchen and restaurant.

As no corner posts are required for the Concertina product, it means the right angled counter remains clear of any guides and the fire curtains remains invisible from view until needed.

## HOW DID COOPERS HELP?

Coopers FireMaster Concertina is a great way to offer compartmentation between areas like a kitchen and restaurant and able to divide up these two critical areas in a public building and act as a fire break.

By installing the FireMaster Concertina meant it would provide the building with an approved, non-invasive means of fire protection that would satisfy the fire regulations as well as ensuring that the open plan design remained as intended.

Compartmentation and Protected Means of Escape were required as part of the fire safety solutions.

“ The Concertina offers fire protection for the customers and staff and remains invisible from view until required ”

A 7770mm long by 5230mm wide, two-sided, open FireMaster Concertina was installed around the serving counter and due to its modern technology, well-engineered design and non invasive properties means it fits perfectly with this open plan, fire engineered restaurant.

The compact headbox was used on the Five Guys fire curtain meaning the curtain is less noticeable when installed and allows less headroom above the ceiling line.

## BENEFITS

Dosteen were able to work closely with the contractors on this project to satisfy the fire regulations. As a manufacturer and installer, through Dosteen, means that the fire curtain was fully project managed so were able to ensure the final, fitted product satisfied the high quality finish required. Coopers are Independently Third Party Certified for Product Testing and Installation.

Coopers fire curtains are recognised as the modern alternative to firewalls, fire doors and glazing, giving designers the freedom to design modern, open plan spaces without compromising fire safety. They are increasingly specified by designers as a solution for open plan designs.

Coopers Fire is a turnkey business, offering the customer a product and service with full provenance. Coopers Fire designs, manufactures, tests, installs and maintains all its fire curtains from our business premises in Havant, Hampshire.

## KEY BENEFITS

- 'Virtual Wall' Created so a Perfect Solution for Open Plan Designs
- Accredited by Independent Third Party Certification for both Product Testing and Installation
- Bespoke Engineering and Project Management
- Manufactured by Coopers Fire in the UK under BS EN ISO 9001 and 14001 systems
